## CHEERS FOR THE PRESIDENT.

He is Warmly Received in Virginia and Responds to the Cries of "Speech."

## HE TALKS ON THE GROWTH OF THE SOUTH

And Marvels at the Increasing Prosperity of the Two Virginias Flowers for Mrs. Harrison Over the State.

ROANORE, VA., April. 14.- (Special.)-When the train bearing the Presidential party arrived in Roaneke at \$550 o'clock this morning a great crowd was waiting on the platform to receive it. As the train neared the city the people who had been apprised of its coming stood along the track, and hundreds of the employes of the Ronnoke Machine Works stood on the cars and fences and cheered a welcome. People on the platform were packed in a dense mass, and outside the fence enclosing the tracks crowds gathered in an ndeavor to catch a glimpse of the Chief

Magistrate.

As the train came to a standstill the President appeared on the rear platform and was greeted with cheers. Mrs. Harrison, Postmaster-General Wanamaker, Mrs. Mc-Kee, Mrs. Russell Harrison and Marshal Transdell also stood on the platform, and they appeared much amused by the efforts of the crowd to shake the President's land.

The President smiled and laughed as he reached down over the railing, grassing hand after hand in quick succession. Then a cry of "Speech! Speech" was set up, and the President, leaning on the railing of the platform, made a few remarks touching the increasing prespenty of Virginia.

THE PRESIDENT'S SPEECH.

The President said: "My fellow-citizens, I desire to thank you very sincerely for this friendly greeting. The State of Virginia is entitled. I think to high estimation among the States for its great history, for the continuous country. These lacts you discovered, I taink long ago. For personal reasons, I have great affection for Virginia. It is the State of my fathers. I am glad this morning to compratinate you upon the marvelous developments which have come, and the greater which is coming to your Common wealth. You not only have an illustrious story behind you, but before you prespects of development in wealth and prespectly in all first makes a great State, such as n wer entered not the imagination of those who laid the foundation of the Commonwealth." ## THE WELDON OUTRAGE. The Times' Report of Undue Privileges to

## Negroes Confirmed.

Weldon, N. C., April 14.—[Special]—The Weldon, N. C., April 14.—[Special]—The admission of negroes into their hotel dining room here last week by the Atlantic Coast-Line has raised a storm of indignation in this place, and justly so. The facts as already published by the Times are true. It has not been charged that negroes were at all times admitted with white people, though that was done on more than one occasion some years ago and did not cease until public opinion forced it. And the occasion which has excited so much comment recently a train-load of negroes and whites, all employes of the South

ern winter resorts, arrived in Weldon about 12 o'clock, and were admitted into the hotel dining room upon orders from Mr. Emerson. While they were at dinner other trains came in with passengers. Whether any of these passengers went in to dinner I do not know, but I do know that a number of them, ladies among them, refused to dine at the hotel, preferring to buy lunches elsewhere.

The fact that this was a special train and the Coast Line had contracted to feed the negroes does not alter the principle in the least, they were taken into the same room and seated at the same table where white people were accustomed to go. It is true the train containing the negroes was expected here at a much earlier hour than it arrived. It seems that this custom has prevailed here four or five years, only by cason of the early hour at which these trains have reached here, none were the wiser. But the fact that it had been kept from the knowledge of our people shows that the Coast Line authorities knew it would be disapproved.

It has been stated in the press of Richmond

knowledge of our people shows that the Coast Line authorities knew it would be disapproved.

It has been stated in the press of Richmond upon the authority of Major Sully that Mr. Emerson was in New York when the affair occurred. I suppose that is true, but orders had been previously received at the hotel here to feed the negroes. The paper also states that at the time the interview with Major Sully was had be was the only official of the road in the city, when I have it on good authority that Mr. Emerson remained in Richmond from about 9 o'clock in the morning until about 3 in the afterneon. The explanation given is a lame one, and does not cover the case at all. The fact remains that negroes were given the same room and the same scats as are given white passengers—seats which the conductors and engineers of the Coast line are not allowed to occupy. It is a bad precedent and should never occur again.

The Northampton and Heriford railroad, which has been mentioned in this correspondence, will certainly be built it is said. It will be extended from Jackson to Timis on the Chowan river and the Norfolk and Carelina railroad, the entire distance being about sixty miles. Ten thousand dollars has already been subscribed to the enterprise and the first installment of 10 per cent, paid in. An election will be held in Jackson township on the first Saturday in May, and in Occonecches township on the first Saturday in June upon the question of subscribing \$15,000 cach to this road. Elections in other townships will be held into the company, and J. A. Burgwyn, treasurer. The directors are M. W. Raussen, Jr., F. S. Farson, F. L. Summerell, G. P. Burgwyn, J. E. Moore, A. J. will move the plant of the Buffalo Lock Manufacturing Company, and will erect large works in East Richmond at once; this will give employment to about 500 skilled mechanics; for

whom 200 residences are now under contract of construction.

The Business of Manufacturing Builders Hardware was started in Connecticut about fifty years ago, and with less than one dozen hands. To day about ten factories are in operation, including the Euffalo Lock Manufacturing Company, and in the aggregate give employment to about fifteen thousand hands, and is constantly increasing in the number of hands. but not in factories, as it takes a great many years to start the business as all the patterns must us made by hand, therefore, it is in one sense a monopoly, and as the trade of American hardware extends to all parts of the world, it is an absolutely safe and profitable one, nor has there over been a failure in this line of business in the United States, caused by the business itself, in the fifty years that the trade has been established. Millions of dollars have been, and are being made in the business to-day, and it is impossible for all the factories to fill their orders promptly. Our reasons for moving to Richmond are that in the item of pig-iron alone we expect to save from one hundred to one hundred and fifty dollars a day, which one item alone would pay about twenty per cent, dividend on the capital. But in addition to the saving in pig-iron we can also save largely in the items of labor, number, fuel, and constant work all the year round, without being prevented by climatic changes. Again, the shipping factities in Richmond are misurpassed, and as our foreign trade is very large we can ship direct from our factories in Richmond to Europe and other countries without changing bulk. Again, mechanics can live cheaper and save more money in Richmond than they can possibly do in the good class of people, as our business alone will add to the population about 2,500 people, a good class of people, as our business alone will add to the population about 2,500 people, and as we expect to increase our force to one thousand or fifteen hundred hands in a short time, most of them being skilled labor from the No
